

State Mapping Note: Phase 4 - Emergency

AFI_CH_P4_EMERGENCY_v1.0 | Approved P1 mapping | Release v1.0

Source definition

Cadre Harmonisé / IPC acute food insecurity phase classification. The mapping is based on the source phase order and reference-table severity concept; it is not supplied by IPC or CH.

Pilot intensity mapping

Scenario	Intensity	Duration
Low	5	1 day
Central	6	1 day
High	7	1 day

Experiential interpretation

The state includes emergency-level food-consumption gaps, marked hunger or weakness, and acute distress where directly experienced. It excludes mortality and other separately modeled harms.

Maturity and limitations

Maturity P1: illustrative author-defined pilot mapping. External food-security, lived-experience, and methods review is needed before treating the value as evidence-informed or calibrated.
